Financial Dashboard

1. Objective & Overview

The purpose of this dashboard is to provide a comprehensive, interactive view of the company's financial performance at a monthly level. It enables stakeholders to monitor key financial KPIs, identify trends, and make data-driven decisions through dynamic filtering and drill-down capabilities.

---

2. Data Modeling & Logic

- **Data Sources Integrated:**
  - Monthly P&L Data (Revenue, COGS, Gross Profit, Opex, EBITDA)
  - Cash Flow Data (Inflows, Outflows, Net Cash)
  - Sales Data (Product/Service, Region, Month)
  - Receivables & Payables Aging
  - Budget vs Actual Data
- **Data Transformation:**
  - Cleaned missing/null values using imputation or exclusion where appropriate
  - Standardized date formats and created a **Date Dimension Table** for time-based analysis
  - Established relationships across datasets using common keys (Date, Product, Region)
- **Key Measures (DAX Calculations):**
  - Revenue = SUM(Revenue)
  - Gross Profit = Revenue – COGS
  - Gross Margin % = Gross Profit / Revenue
  - EBITDA % = EBITDA / Revenue
  - Net Cash = Cash Inflows – Cash Outflows
  - Budget Variance % = (Actual – Budget) / Budget

---

3. Dashboard Features & Interactivity

- **KPI Cards:**
  Displays high-level metrics: Total Revenue, Gross Margin %, EBITDA %, and Net Cash
- **Time Filter:**
  Allows dynamic selection of Month, Quarter, and Year using slicers
- **Visualizations:**
  - Revenue & Profit Trend (Line Chart)
  - Budget vs Actual Variance (Bar Chart)
  - Cash Flow Waterfall (Inflows vs Outflows vs Net)
  - Product/Service Performance (Bar Chart)
  - Receivables/Payables Aging (Column Chart)
  - Revenue by Region (Donut Chart)
- **Interactivity:**
  - Slicers for Region, Product/Service, and Date Range
  - Drill-down capability (Year → Quarter → Month → Product Level)
  - Cross-filtering across all visuals

---

4. Key Insights

- Revenue shows moderate fluctuations with peaks in mid-2024, indicating seasonal or campaign-driven performance
- Gross Margin remains stable (~40–50%), suggesting consistent cost control
- EBITDA margin (~25%) indicates healthy operational efficiency
- Certain products (e.g., Product C / Service X) contribute the highest revenue share
- Cash flow analysis shows strong inflows but notable outflows impacting net cash
- Payables aging highlights a concentration in the 0–60 day bucket, indicating manageable liabilities

---

5. Assumptions

- Missing financial values were treated as zero or excluded depending on context
- Budget data is assumed to be static and predefined for comparison
- All monetary values are in consistent currency (e.g., USD)
- Time granularity is monthly, with aggregations applied for quarterly/yearly views
- No major outliers were removed unless clearly erroneous

---

6. Conclusion

This dashboard provides a centralized and interactive financial overview, enabling stakeholders to track performance, identify trends, and make strategic decisions efficiently. The integration of multiple financial datasets ensures a holistic view of business health.
